

AMERICAN LICORICE COMPANY

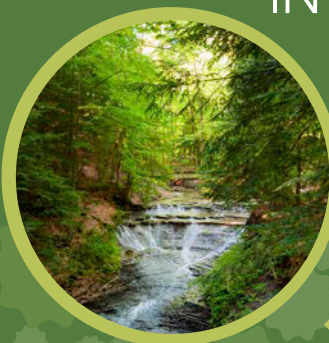

# REDUCING CARBON FOOTPRINT

The company eliminates and offsets its carbon emissions through these partnerships:

## 1 GREEN-e ENERGY CERTIFIED RECs

We purchase Renewable Energy Credits (RECs) sourced from wind farms for 100% of the electricity used in LaPorte, IN and Union City, CA facilities.

## 2 THE CONSERVATION FUND

CO<sub>2</sub> emissions from our natural gas usage at our LaPorte, IN and Union City, CA facilities are offset through an investment in The Conservation Fund's sustainable working forests in Northern California.

## WHAT DOES IT ALL MEAN?

We are removing CO<sub>2</sub> emissions annually, approximately equivalent to:

13,197,043 pounds of coal burned

1,391,612 gallons of gas consumed

1,306 homes' energy use for a year
